## Because the world is beautiful.

There's nothing more beautiful than the natural world and nowhere more special than the part of it that you call home. When you connect to the beautiful world outside, you live better, every day. By bringing light, air and views inside, you can enjoy all that nature has to offer.

At Centor®, we believe you should have the beauty of the outdoors in your home and the control you need for maximum comfort and enjoyment. We want you to be able to create true inside-outside living, without any compromises.

## Setting new standards for 68 years

Founded by German engineer Frank Spork, Centor was first formed in Brisbane, Australia in 1951.

Now a third-generation family business, Centor has forged a reputation for designing and manufacturing the industry's leading window and door systems.

In 1998, Centor designed and patented hardware for the modern folding door that enabled them to be used as exterior openings for the first time. These doors allowed architects to design homes which could connect people to the world outside.

Following the success of its folding door technology, Centor delivered another world-first – a retractable insect screen that could be used on large door openings and operated with the touch of a fingertip.

In 2013, Centor launched the award-winning Integrated Door – the first patio doors to have concealed hardware and built-in insect screens and shades.

Today, Centor manufactures products in 4 global locations and sells into many more, enabling homeowners around the world to enjoy inside-outside living when their local weather allows.

Frank Spork, Centor Founder

## The finishing touch for your doors and windows

Whether you are renovating or building, creating a seamless inside-outside living experience is important in any modern home.

The many benefits of insect screens are becoming more recognised by UK homeowners. Centor customers who have opted for an insect screen in their Integrated Doors often admit to being pleasantly surprised at how much they use it: "Although there are a lot of midges near the moorland, we really didn't expect to need it very much. It's been so useful though – even in England!"  
Deb, Homeowner.

Add the finishing touch to your home with Centor's range of stand-alone insect screens and shades. Our unobtrusive designs can be paired with many different styles of doors and windows, and fitted to a new or existing opening.

You can specify Centor Screens in a wide range of size, colour, and material options. Our systems are then custom-made to your requirements using the finest quality supplies and craftsmanship.

Backed by 68-years of engineering excellence, Centor's screening systems glide with smooth, fingertip operation and are easily accessible when needed while remaining hidden when not.

## S2 Screen

Perfect for smaller openings, Centor's S2 Screen enables you to enjoy fresh air, breezes and uninterrupted views in your home at any time of day without any disturbance from insects.

### Simple to use

Operating with just a fingertip, Centor's unique load balancing technology allows the screen to glide smoothly across the whole door opening to effortlessly stop at any desired position.

### Considered design

The S2 Screen has been designed to complement all new and existing doors and windows in renovations, extension projects and new construction. The compact frame design ensures it can be paired neatly on the inside or outside of the opening.

When not in use, the screen retracts horizontally into its frame, leaving nothing to disrupt the view and protecting it from damage, dust and dirt. This is especially important for a seasonally used product.

Installing a flyscreen means that doors can be open more often, increasing ventilation throughout your home. Should the screen mesh blow out of the top or bottom track, it will feed back smoothly onto the roll the next time it is retracted.

### Configurations

The S2 Screen is available in two screen configurations:

*Single:* a single screen that extends from one side of the frame and covers the full width of the opening.

*Double:* two screens meeting in the middle of the opening.

To see the full range of specifications for the S2 Screen, visit [centor.com](http://centor.com).

## S4 Screen and Shade

Centor's latest screening system, the S4 Screen and Shade enables homeowners with large door openings to enjoy the luxury of inside-outside living without the traditional compromises – insects, glare and loss of privacy.

The S4 Screen and Shade System has been presented 'Red Dot: Best of the Best'. This accolade is awarded only for revolutionary design and is the highest award in the competition. This prize is reserved for the best products in a category.

Throughout the world and across different industries, Red Dot is seen as the award for groundbreaking design. A jury of 40 international experts assessed over 5,500 product entries from around the world. They awarded the sought-after Red Dot seal of approval only to those world-class designs demonstrating superior quality and innovative power.

## S4 Screen and Shade

### Simple to use

Operating with just a fingertip, Centor's unique load balancing technology allows screens and shades to glide smoothly across the whole door opening to effortlessly stop at any desired position.

### Considered design

The S4 Screen and Shade complements large sliding and folding doors. It can be fitted to the inside or outside of the opening so you can maximise inside-outside living to its full potential.

The screen and shade are fully retained within the frame on all sides to allow control of insects, sunlight and privacy. They retract discreetly into the frame when not in use, removing visual distractions to the view outside whilst also protecting them from damage, dust or dirt.

The addition of both top and bottom tab tracks on the fabrics ensure shades are held snugly in the frame and insect screens remain securely in place - even in a breeze.

The screen mechanism is easily accessible through the removable covers to make cleaning and servicing simple and ensure the continuous performance of your screen for years to come.

### Configurations

With four options to choose between, there's a configuration to suit your home:

*Single:* a single screen or shade that extends from one side of the frame and covers the full width of the opening.

*Combination:* a combination of two fabric types, with one housed in each side of the frame, such as a screen from the left and a shade from the right.

*Double:* two screens or shades (in the same fabric option), which meet at any point along the opening.

*Cornerless:* two screens or shades (in the same fabric option) meet at a 90 degree angle opening. This option allows for no corner posts to interrupt your view.

## Finishing options

You can specify Centor Screens in a wide range of size, colour, and material options. Our systems are then custom-made to your requirements using the finest quality supplies and craftsmanship.

### Insect screen

Enjoy fresh air without the worry of insects. The durable insect mesh used for all Centor Screens has no pleats or lines to detract from the view and is available in a choice of weave to suit your needs.

### Shade

To stop glare and provide privacy, light-filtering and blackout shades are available in a choice of stylish patterns and a range of colours to suit every home.\*

Both the mesh and fabric in Centor screening systems can be replaced and updated whenever the mood takes you. Replacement screens can be ordered by your Centor Screen Dealer.

### Frame finishes

All Centor screening systems are constructed from durable aluminium. S2 and S4 can be powder-coated in any RAL colour of your choice.

## Meticulously made-to-order

Our founder Frank Spork emigrated from Germany to Australia in the 1930's, so it was only a matter of time before Centor returned to Europe.

Centor's made-to-order screening systems are produced at our factory in Stryków, Poland, with a focus on manufacturing products to the highest standards. Centor's experienced European team maintains a constant relationship with our Engineers and Designers located in our Product Design Centre in Australia, to ensure the highest quality outcomes at all times.

Centor's screen and shade systems are backed by a 5-year limited warranty covering material and manufacturing defects. Visit [centor.com](http://centor.com) for full warranty details.
